

# PROTECT NUCLEAR NOW

DEAR PRESIDENT BIDEN,  
PLEASE USE YOUR EMERGENCY  
POWERS TO PROTECT NUCLEAR  
NOW, BEFORE WE LOSE EVEN  
MORE OF OUR **CLEAN ENERGY!**

## IT'S AN EMERGENCY WHEN CLEAN ENERGY IS BEING SHUT DOWN

People all across the U.S. rely on clean nuclear power 24x7. It is time that we recognize that it makes **zero sense** to shut down nuclear, our largest source of zero-emission energy!

Join with climate advocates, academics, energy experts, engineers, environmentalists, entrepreneurs, union workers, mothers, fathers and their children who recognize that what we need is rapid deep decarbonization of the U.S. economy. We seek to prevent the premature shutdown of our largest source of carbon-free energy—America's nuclear power plants. We are calling upon the **Biden Administration** to declare a **moratorium** on premature nuclear plant closures until we have a better plan that does not allow this irreversible action to cause **increased emissions, dirtier air, less reliable energy and higher costs.**

We can't let lack of federal action on climate and carbon pricing allow bad, irreversible decisions to be made about our investments in clean, reliable nuclear energy. President Biden has pledged to "leverage the carbon-pollution free energy provided by existing sources like nuclear and hydropower." Let's do that!

Go to **ProtectNuclearNOW.org** and join with others demanding that partisan politics and short-term energy profits don't leave Americans with dirtier and less reliable energy.

**AMERICANS  
NEED CLEAN &  
RELIABLE GRIDS**
